

Thermocycling Run on TEC A

This is a report automatically generated after a run on TEC A. The contents of this report include when the run started and ended, which protocol was used, plots for the expected temperature, actual temperature (where actual here means the temperature measured by the internal temperature sensor for TEC A), the sink temperature, and when the fans were on for TEC A. Extra information regarding the cartridge used, the pressure applied to said cartridge, the elastomer/bergquist used if at all, images before/during/after, and positions for the clamp and tray are not included within this report.

Protocol Status

This section includes the protocol statuses for all TECs at the end of this run.

	TEC A	TEC B	TEC C	TEC D
Status	Not Connected	Not Connected	Not Connected	Not Connected
Protocol	Short Test Protocol	Short Test Protocol	Short Test Protocol	Short Test Protocol
Protocol Running	No	No	Yes	Yes
Estimated Time Left	00:00:00	00:00:03	00:00:10	00:00:07
IO	Running	Running	Running	Running
Step	4	4	3	3
Cycle Number	2/2	2/2	2/2	2/2
Temp (°C)	?	?	?	?
Target Temp (°C)	30	30	50	50
Sink Temp (°C)	?	?	?	?
Fan RPM	?	?	?	?
